Street Car Smokers

Some months ago, the City Council passed a bylaw which purported to prohibit smoking in Edmonton street cars. The Council should either rescind that bylaw or see that it is enforced.

This does not pretend to be a defense of the bylaw or a condemnation of it. There are good arguments in favor of permitting smoking on street cars and there are equally good arguments against it.

But there is no argument in favor of a bylaw or a regulation that is not enforced. The piles of matches and cigarette butts piled up on the street cars are ample evidence that no very drastic effort is being made to enforce the regulation.

Every time any person is permitted to flout the street car smoking bylaw, the enforceability of every other bylaw is weakened. When the rule is held in contempt, all rules are held in contempt.

The Council should do one thing or another. For the sake of good civic government, this bylaw should be rescinded or enforced.

Platform Floodlights

The homecoming of Edmonton's servicemen, who return as casualties from overseas, is somewhat of a problem. The city has no floodlights on the platforms of the local stations.

Most of the trains carrying these men arrive after nightfall. In the gloom of the platforms it is difficult for relatives to distinguish the returned servicemen in the crowds. It is difficult for the men to find the people who turn out to welcome them to perform their functions easily and well.

Moreover, it is not productive of that spirit of encouragement, hope and happiness, which should prevail at such times, that the men should have to step out into a sea of shadows.

It would not be a costly matter for the railway companies to install a series of floodlights so that the returning men, coming home to their families, would be able to pass through at least one patch of bright light where they would be easily recognized.

Surely men who have fought to preserve the light of freedom should not be welcomed home in a fading darkness in the train.

Train Taxi Service

Quite a number of complaints are heard about the taxi service—or lack of it—in connection with trains arriving in Edmonton during the early hours of the morning. There is no connection with the early train from Calgary.

One traveler declares, presumably with truth, that one recent crowded train was met by only one taxi, and that passengers, heavily laden with baggage, had to wait in the severe cold for street cars that were not scheduled at that hour to carry train traffic.

Now, everyone knows that the shortage of gasoline and labor has made a curtailment of taxi services necessary. But those who have recently left the city for other cities point out that the curtailment in Edmonton seems to be much more drastic than in other places.

This is to suggest that the city license department or whoever has control of these things should make a point of finding out whether or not the taxi service in other cities is getting the best taxi service possible under the circumstances.

The inference is that they are not.

Another Bear Trap

On the third day of their drive south from Poland the Russians out of the Warsaw railway in the rear of the Nazi army in the Ukraine. This in itself was a feat, for the Hitler generals knew how vital that railway was to them, and no doubt had taken what they supposed to be adequate measures to hold it.

With anything less than the immense manpower reserves of the Red army, it is a sweep around the rear of the powerful enemy force could set the stage for disaster to the Russians. To show no hesitation around an enemy estimated to be from a half million to a million strong is obviously a venturesome operation.

Paris: A Yellow Book just issued contains a copy of the document signed by President Wilson and M. Clemenceau, and the late Premier Lloyd George, and referred to by the latter as the "secret treaty."

The fighting is not over yet, and may not be ended for some time. The hardiness and manpower are to be lauded. Here, Hitler seems to be due to lose another Stalingrad army.

Uniformity Needed

Ontario's minister of labor says the national Labor Code will be applied to all industry in that province, and that the 48-hour week and holidays with pay will be standardized by law. At that, Ontario will not be ahead of the other provinces in working week of 44 hours is common practice, with or without compulsion of law.

However, Ontario and Quebec, though

the most heavily industrialized of the provinces, have not led the way in humanizing labor legislation, and a 48-hour week may be as far as the minister thinks Ontario employers are willing to go. This perhaps was what Mr. Daley had in mind when he said "In a labor agreement that deals with human endeavor, there has to be something more than the written word of the legislature. There must be good-will."

How the Ontario manufacturer—who is the big figure in industry in that province—will meet the new condition is a matter of importance. Whether he will accept the change courageously and expand employment, or become frightened and restrict his operations, will have a great deal to do with the situation in the post-war years.

One point seems clear. The more uniform laws there are made in the provinces the less employers in any province will be inclined to hold back from expanding their operations and creating more jobs. Since one cannot be compelled to employ another, this question of bringing labor legislation and conditions into line across the Dominion is a subject which the provincial authorities should take into account.

Herr Hitler's newspaper says Germany has lost more pilots than civilians in the airfight. That is good news, from every point of view. It is no part of the Allied policy to kill civilians. The loss of pilots can be more serious to the enemy than the loss of planes. And the statement gives the lie direct to Goebbels' standing claim that the bombing raids have been mainly effective in killing non-combatants.

The four-ton bomb blast was a new record and the six-ton bomb has been tried out and will become standard equipment for Allied raiders. The super-busters, it is suggested, "can be used to nullify Germany's attempt to get destroyed plane plants back into operation." That seems probable. It is hard to imagine anything more effective than the regular dropping of a well placed charge of six tons of high explosive.

Russia is to get some of the surrendered Italian warships. They will not be of much immediate use unless they are allowed to participate in the Black Sea. The loss of ships is a well placed charge of six tons of high explosive.

While the modern industry has evolved from scarcely less than an age of plenty, the 19th century system of debt finance has resisted change. It is also a system which operates with no fundamental change in the restrictive limitations of the earlier time of scarcity.

In the 19th century, railways displaced stage coaches, marine engines displaced sails, and the steamship replaced the place of wood in ship-building.

(These letters are from Edmonton Bulletin readers. The views expressed may differ from those of the Bulletin's own view. Brief letters are preferred. Letters should be shorted if lack of space requires. You must give your name and address, and the name of the paper, and the name of the newspaper and cannot be returned.)

"By Their Fruits"
Editor Bulletin: I'm replying to letters in The Bulletin of Feb. 25. A. C. G. is wondering how he and Rev. J. T. Foran are permitted to have such a long letter in your column while others not half so long are not printed. Why also is the letter of the 25th not printed at great length this religious question while a Protestant is accused of creating contention and separating the people it is so important to me.

I also see by the press that one of the Quebec members took up a question of the 25th. The Bulletin of the 25th is a very good one. I also see by the press that one of the Quebec members took up a question of the 25th. The Bulletin of the 25th is a very good one.

The British war in Gambia is ended. Louis Komtula, the Hungarian patriot, is sinking. A new militia bill is to be brought down at Ottawa.

Ex-Premier Mercier talks of revolution if separate colonies in the Territories are not conceded. Coughlin, on trial at Chicago for the murder of Dr. Charles H. Jackson, has been abandoned in the Atlantic in the last three months.

1904: 40 Years Ago

Vancouver: Summer prices to cattle car owners are to be reduced \$1.00 per hundred, in return for the use of the cattle car, to \$1.00 per 100 lbs.

London: The Russian land forces are reported that they have suffered a heavy defeat on the north bank of the Dnieper.

The Edmonton Olympic and Dramatic company has received the scenery for the opera The Chimes of Normandy, which they will present in Robertson hall about Easter.

With today's issue of The Bulletin publishes, as a supplement, a map of the scene of the Jap-Russian war.

1914: 30 Years Ago

Washington: Dr. Bell, inventor of the telephone, predicted that he would be crowned emperor of Atlantis at an altitude of two miles, with crews and passengers, heavily laden with baggage, had to wait in the severe cold for street cars that were not scheduled at that hour to carry train traffic.

School opened today in the new King Edward school building. On June 1 the erection of the arts building at the University will be commenced.

Dublin: Excitement is growing in Dublin as the result of an outbreak of mutiny in the Nationalist army.

Modern Finance Is Outmoded Relic of 19th Century

Orthodox Experts Reveal Themselves As Archaic Bunglers

From the Ottawa Citizen
Lord Somers' recent address to the boards of trade in Ottawa in favor of 20th century economics has brought forth the usual comment from a negative source. It cannot be denied that Lord Somers is a notable record of public service, based on practical experience in industry and commerce. He is not in war: so the negative comment is that he is not an expert in finance.

The record of many so-called experts has been so discredited in the years since the last war, few men with modern business experience would hold a against Lord Somers that he cannot be expected to meet the orthodox authorities of debt finance. As he has well said:

"The orthodox authorities of debt finance, under the impetus of war, formulated under the influence of economists of the last and earlier centuries, a system of debt finance to industry has brought about, in an incredibly short space of time, the greatest revolution in the whole course of human history in the fundamental facts upon which all our economic theories are based."

While the modern industry has evolved from scarcely less than an age of plenty, the 19th century system of debt finance has resisted change. It is also a system which operates with no fundamental change in the restrictive limitations of the earlier time of scarcity.

In the 19th century, railways displaced stage coaches, marine engines displaced sails, and the steamship replaced the place of wood in ship-building.

in the saddle. They persuaded Mr. Baldwin, the value of the gold standard should be still more drastically imposed as a way to restore the gold standard. Winston Churchill was chancellor of the exchequer when the monetary policy of the government was to bring about this return to the 19th century system. He has since given testimony on the monetary policy of the so-called experts in the House of Commons. He is now in London. It brought the United Kingdom to the verge of revolution by providing the general strike in 1926.

Under the guidance of financial experts, the value of the pound sterling rose in foreign exchange, and the value of the pound rose in the United Kingdom. The French importers of British coal consequently were unable to pay the higher price in France. They turned to Poland for coal.

The record of many so-called experts has been so discredited in the years since the last war, few men with modern business experience would hold a against Lord Somers that he cannot be expected to meet the orthodox authorities of debt finance. As he has well said:

"The orthodox authorities of debt finance, under the impetus of war, formulated under the influence of economists of the last and earlier centuries, a system of debt finance to industry has brought about, in an incredibly short space of time, the greatest revolution in the whole course of human history in the fundamental facts upon which all our economic theories are based."

District News in Brief

Sedgewick Curlers 11 Rinks Complete Win at Lethbridge In Red Deer 'Spies'

SEDGWICK—Mrs. J. Halse left for Kimberley, B.C., to visit her daughter, Mrs. K. Sparks and daughter are visiting in Edmonton. Miss Angie Conklin returned home from a visit in Saskatchewan. Mrs. Fred Bowles and baby daughter left for a visit to Kennedy, Sask. Art Smith has returned from a holiday in Valcan and Calgary. Mrs. Blakely, Mrs. M. Monk, Mrs. Billow and Mrs. Birch won second place in the secondary event of the Dayland women's bonspiel. Mrs. Otto Andersen and children returned to their home in McBride, B.C.

The W. W. Rose rink won the Herald event and the grand aggregate at the Lethbridge bonspiel. Mr. and Mrs. W. J. Haynes arrived home after spending the winter in British Columbia. Mrs. J. Gosnell and D. Richardson were recent visitors to Edmonton. H. Romboigh has gone to Calgary.

Saturday, the men's curling club were hosts to the district farmers at a bonspiel held here. John Adamson and rink won the Grand Challenge event while J. Muirhead the secondary event. J. Gair and J. Ferrier attended the 44th annual smoker of the Poudre River Veterans held in Edmonton last week. A number of friends gathered at the home of Mr. and Mrs. D. Richardson to celebrate their 25th wedding anniversary.

The annual men's bonspiel was held last week with one of the largest entries ever received. Rinks entered number 24. S. Cochrane of Dayland won the Citizens' event; Austin Smith, the Grand Challenge; and the Rev. Mr. Brundage of Dayland the consolation.

CLIVE—PO. G. S. Harrow, R.C. A.F. spent leave here recently.

Arrives Overseas

O.S. N. W. Shandro, son of Mr. and Mrs. W. N. Shandro of Winnipeg, who has arrived safely overseas according to word received by his parents. O.S. Shandro enlisted in the R.C.M.V.R. in July 1943 and prior to going overseas trained at Edmonton, Victoria, New York, N.Y. and Boston, Mass.

councillors on the body. Two of them, Alex Byrie, Div. 5, and John Hillman, Div. 7, were elected by acclamation and the other nine were elected at the municipal election on Feb. 22 and are: Div. 1, E. G. Christensen; Div. 2, M. L. Kelly; Div. 3, James Brewster; Div. 4, B. Parsons; Div. 5, David Pearson; Div. 6, R. H. Edgar; Div. 7, Fred Donnelly; Div. 8, E. M. McPherson; Div. 9, E. H. Wilson. The former municipalities of Golden West, Poplar Grove, Arthur, Pine Lake and Hays are included in the new setup.

BRUCE—On Sunday a farewell party in honor of Sam Gordon was held at his home. Mr. Gordon a resident of this district for 20 years has sold his farm and is moving away.

Air Power Destroy Hitler's Fighters

By Maj. A. P. de Seversky

The most significant single fact about the great air offensive now in progress in the skies over Germany is the choice of objectives. It is clear from the action itself, and from statements made by spokesmen for our Air Forces, that Hitler's defensive aviation has been told off as an "enemy number one" and slated for systematic elimination.

This means that we are hammering, apparently with substantial success, at Hitler's Fighter Command, both on the ground and in the air; at its points of origin in aviation plants, and through direct sky combat. This procedure, in the writer's view, indicates that airmen, understanding the nature of the basic air power decisions that at long last been given the right of way in directing the battle of Germany.

For a long time the air attacks on Germany, which previously they looked like pure air strategy to laymen, were in fact largely auxiliary or diversionary actions planned to support the main surface operations elsewhere. Our strategic air forces, for instance, were ordered to bomb submarine bases, and did so with splendid results. Or they were ordered to bomb truck factories outside of Paris; great ammunition plants; and so on. In fact, the only form of the first thing that General Spaatz did to was to concentrate his available forces against the enemy's air power, and particularly against the Fighter Command. We are now witnessing the brilliant results.

COMMAND OF AIR You can destroy all the tank plants in Germany without being any closer to command of the air. But once you destroy Germany's defensive aviation, you achieve command of the air, and can proceed to bomb tank factories or any other targets virtually at will. It may well be that our troubles in Anzio were the result of the lack of air power to the need for eliminating the opposing air force. Certainly the projected invasion of the continent requires the removal of this menace.

The backbone of the Luftwaffe must be broken in order to avoid the possibility of disaster in connection with the invasion, and that is precisely what our top air command is now busy doing. Until recently, as we know, only a fraction of strategic bombing power was made available for the direct assault on the Luftwaffe, and a great part of that little was dissipated in bombing other targets. At present the air command appears to have a strong force in their hands and are applying it in the best manner.

MISTAKES OF VALUE One of these mistakes was in writing "Victory Through Air Power." I declared that the mistakes made by the Germans in the Battle of Britain would be of value to us, provided we understood them and avoided repeating them ourselves. The student of aerial warfare, I wrote, "can discern the nature of the German errors and, therefore, how they can be avoided and how to score a decision through air power."

One of these mistakes was their failure to select targets in Britain. "Those thousands of planes and pilots invested in striking at London might have been expended more intelligently against key industrial centres; against production units of the aviation industry, especially those related to the fighter command, such as the Rolls Royce engine plants as well as Supermarine and Hurricane plants; and, in general, against the ground potentials of the air force. That would have amounted to a double-barrelled attack on the opposing air power, eliminating it simultaneously in the air and on the ground."

Unhappily, we made the equivalent mistake. But at present the key German target has been found and is being attacked in full force. That is one of the most hopeful developments of the war in Europe. We are also avoiding the other main errors made by the Nazis over the British Isles, as will be shown in a subsequent dispatch. Released by McNaught Syndicate, Inc.

PRIVATE BUCK

CORONATION—The following officers were elected at the annual meeting of the Women's Hospital Aid held at the home of Mrs. H. Campbell, President. Mrs. H. Ellis, vice-president. Mrs. D. N. Campbell, secretary. Mrs. F. S. Mitchell, treasurer. Mrs. J. O'Brien, buying committee. Mrs. N. Brown, Mrs. Noren and Mrs. O'Brien, requisition. Mrs. C. A. Ross and Mrs. Lamrock. Mr. and Mrs. A. Cole are leaving shortly to make their home in British Columbia. Their only son was killed in action in Italy recently. S. Barndstedt and David L. Hood have returned home after working in Edmonton for several months.

Matchless in Quality and Flavour!

Quality BEGINS with Quality INGREDIENTS

THE FINEST of Jamaica's ginger root—pure cane sugar—the choicest extracts, oils and essences from around the world—specially purified, ultra-violet-ray-treated water... these are blended and balanced to a secret, scientific formula never successfully imitated.

Every ingredient is analysed for quality and every step in manufacturing is checked by qualified chemists.

That is why Canada Dry is always the same high quality, no matter where you buy it. That's why it is world-famous as "The Champagne of Ginger Ales."

If your dealer does not always have Canada Dry on hand, we're sorry—but don't blame him. War-time conditions are responsible.

The Champagne of Ginger Ales

Industrial Bank Project Draws Some Criticism

Continued from Page One

could be used to control the whole banking policy and economy of the nation.

The bank measure introduced last week by Douglas, minister of finance, is the first of several post-war measures planned for the present session. The function of the bill is to provide credit to industry for conversion from war to peace, long-term credit that is available from the chartered banks.

Mr. Hanson said Douglas, assistant to the minister of finance, had said the bank would not compete with the chartered banks. The need was said to be that of "intermediate credit" not provided by the chartered banks or mortgage institutions. Mr. Hanson said that the bill would be a necessary step in the conversion of the war to peace.

Private enterprise had not failed in converting the economic problem said Mr. Hanson.

\$100,000,000 REQUIRED

If the industrial development bank scheme was sound, more than \$100,000,000 in resources was needed by the bank, he said. This amount was only a "drop in the bucket" in light of the national debt of \$800,000,000 to \$900,000,000. Actually, there was sufficient private money available for the needs of financing.

The government would arrange for the production of commercial goods to keep the wheels of industry turning, he said. There was not full employment in Canada today, but it was some time impossible to purchase children's underwear. The children were short at a time when they understood so many army war materials had been produced that there were 300,000 on hand as a reserve.

QUESTION NOT ASKED

Col. Ralston said Mr. Hanson had never asked. The army had ordered overcoats in accordance with its needs. Mr. Hanson said there were 200,000 overcoats and he doubted if the defence minister knew of the surplus. "I would know that," said Col. Ralston.

Mr. Hanson said there should be a revamping of the government corporate tax policy before the end of the war so business men would know what to expect. Canada was the only country that had a tax deduction of corporate earnings.

He said this taxation was a detriment to the investment of new capital.

Government funds were to be used in the capital expansion of companies which would raise money on their own, he said. There were risks involved, he meant the government was in effect putting subsidies into "lame duck" enterprises.

NOT PROVIDING MONEY

Mr. Abbott said private industry was not providing the money required for industrial financing now. Mr. Hanson said government money would be put into industry to compete with private industry. He said he wondered if the bank was to be used to start in the post-war phase of war plants.

Mr. Hanson said he deplored the centralization of industry to the detriment of areas such as the Maritimes. If the proposed bank was to be used to decentralize industry he would give it his blessing. But so far he had great doubts about the measure. There should be more information on plans for full employment and taxation policies of the future.

EXTENSIVE ASSISTANCE

The bill was ambiguous in that it did not indicate whether it would assist, cooperative as well as privately-owned enterprises, he said.

Daily War Map—Exclusively in The Edmonton Bulletin

The bill should have been accompanied by a measure to provide a similar capital assistance to agriculture. There was also a need for social assistance to the mining industry, particularly the smaller mines.

Mr. Caldwell said he hoped the bill would not operate only to finance private enterprise. He said the bill did not begin to provide assurance of full employment.

NATIONAL INVESTMENT BANK

A national investment bank in the light of this bill should be incorporated at the earliest possible moment, he said. It should be a national bank that could issue interest-free money for public purposes. In times of inflation it should go out to get money away from the people by providing loans. It should be used to control investment now. Pending the creation of such an institution, social welfare would flow into socially useful projects, instead of wealth and speculative ventures.

"This institution destroys to some extent the argument for private enterprise," he said. "It goes some distance in removing the risk from private enterprise. It is supposed to be reimbursed."

John Blackmore, New Democracy leader, said the bill started at the wrong end if it was intended to maintain full employment. It should start by assuring the people money with which to purchase goods. No industry had a fear of not getting money from the government. All were afraid of not being able to sell goods. If they could sell goods they could get all the capital they needed.

OBVIOUS LIMITATIONS

The bill would have a certain value in providing capital to enterprises but had obvious limitations. He said he questioned who would judge what industries should be assisted and whether the provinces would have any say. If not he feared some provinces would suffer discrimination.

"It looks like that this bill is a useful step, which, when weighed in the balance, will be found wanting," he said.

The bill might be used to control the banking system, he continued. It was not necessary, as the C.C.F. suggested, to own the banks in order to control the banking system.

"We are proving that in Alberta with our treasury branches," he said, "although they are small and weak in themselves."

By loaning in cases where the banks refused to loan, the government institution could force the banks to lend as desired. It made a bank of issue, it could create in interest free money and lend at low interest rates, thus forcing the banks to lower interest rates.

SOME LOANS REFUSED

The commercial banks in the past had refused to lend to certain industries in certain parts of the country, said Mr. Blackmore. A government agency of the kind proposed could overcome such discrimination and bring the banks into line.

A bank of this kind could control the economy of Canada," he said. It could decentralize industry and the provinces in balancing their credit and make them more self-sufficient.

"A bank of this sort can control the banking policy of Canada, doing it by strategy instead of by ownership," he said.

Mr. Blackmore said he doubted

Fixed Mothers' Allowance Scale Is Announced

Continued from Page One

ply, thus ending the budget debate, was carried on a voice vote by the House of Commons from the opposition side of the Assembly.

Sixteen speakers took part in the debate, since the budget was introduced on Feb. 24. Following its introduction, the House went into committee on the budget, which will probably continue for a week.

ANSWERS CRITICISM

Mr. Low's address was mainly directed at opposition criticism of the new budget, as voiced by various speakers.

Repeating statements made by King, Mr. Low (C.P.F.-Edmonton) regarding mothers' allowances, Mr. Low said that in the last three years the allowances have been steadily rising upwards, and in that time the average monthly allowance per child has risen by 38 per cent.

Mr. Roper had advocated a survey of the whole field of allowances, and in that respect Mr. Low said "a survey is going on all the time, just as fast as the staff can possibly carry it forward."

"We are doing this while at the same time improving in great measure the condition of the old age pensioners and the old age measures available to the people have been increased, and at a reduced cost and, in addition, the organization of the health services of this province, not to mention many other services," said Mr. Low.

The honorable member seems to forget that there are a number of mothers who want and need, all of which have been treated fairly on a limited amount of money available.

SAVINGS OF \$138,741

In tabling a report of the government on the mothers' allowances, the minister said that during 1943 this branch of the treasury department effected savings resulting from competitive bidding that amounted to \$108,741. In addition, specific discounts of \$1,577 were obtained, and sales and excise taxes recovered from supplies amounted to \$19,706. "Total savings, therefore, to the government in 1943 in the business ran to \$138,741," the house was told.

Replying to a matter raised by Gordon E. Taylor (S.C., Drumheller), the minister said that the University of Alberta regarding studies of military age result in numbers and percentages of the population of the province having to leave the university without completing their year, Mr. Low said that the minister of education had said to this:

"The regulations of the university are quite liberal in this respect, but the Dominion government has maintained a list of the regulations that are very rigid and which they require the university to carry through as a part of the Dominion manpower and military policy. However, the university is inclined to interpret the requirements as liberally as possible."

The minister pointed out that in the field of education, items needed included:

1.—Sufficient money to provide educational services for rural children, comparable to the best now being given to urban centres.

2.—More money for teachers' salaries, so that they may consider it worth while to secure a first class education and to remain in the teaching profession—to make it a career.

HEALTH SERVICES

3.—A full-time health unit in every school division.

4.—A greatly increased number of well-equipped composite high schools at strategic points throughout the province.

5.—An extensive building program designed to replace worn-out and inadequate buildings with new ones planned to meet the modern needs of the pupils and the community.

distribution of that production.

"The purpose of an economic system ought to be to enhance the happiness of every person within the society and to provide him with abundant opportunities for expression, freedom of thought and action and security. It is my conviction that a full application of the Social Credit principles will achieve these things for society. Social Credit is not a 'funny money' system; it is a complete philosophy of life. It is a philosophy of human beings in relation to the principles of Christianity, and anything which militates against the good of human beings is contrary to the principles of Social Credit."

On March 7, the House of Commons passed the bill by a vote of 154 to 10. Mr. Low said the province should be guided by three basic principles: 1.—Any settlement must be arrived at by negotiation with our creditors.

2.—The terms of settlement must be fair and equitable to both the bondholders and the people of the province.

3.—The fundamentals of any scheme of settlement must be such as to restore the market value of Alberta bonds, thereby refunding will accomplish little or nothing.

"I believe there is a satisfactory basis on which the whole matter can be settled, and to that end we shall constantly strive."

6.—Intelligent leadership in the field of adult education to the end that in every community the school plant will operate perhaps far into the night, so that every adult who has the desire and capacity might complete the education interrupted by the necessity of his leaving school to go to work or to go to work, or to rear a family.

7.—A modern library service. "Sometimes my determination to preserve the good standing of Alberta within the system presently imposed upon us as an ordered (national system) has been interpreted to mean that I have turned my back on the principles and the philosophy upon which I was elected to this House," Mr. Low said in his address. "This is not so."

NO OVERNIGHT CHANGE

The minister said that he was convinced that the change from a method of finance to a full Social Credit system cannot be made overnight.

"It ought to be fairly obvious to everyone that leaders can only move forward as fast as people will let them go. Where the Socialists would regiment the people into taking their particular yoke upon them, true democrats, such as Social Crediters, declare themselves to depend upon education and orderly social change which is natural growth or evolution—not revolution."

"That evolution is now taking place in Canada, and we are moving closer and closer to a realization of the principles of Social Credit."

Mr. Low said later that he believed, in order for our people to be able to make use of the goods that are produced in this society, a change in financial system will have to be devised for the equitable

Statement on Liquor Given House by Low

Continued from Page One

From the 24,811 gallons, the amount of Alberta's quota under the Dominion Government. Wartime Alcohol Beverages Order was fixed. Seventy per cent of the base year purchase was the quota figure, 27,500 GALLON EXCESS.

From the 1942 figures, it is seen that purchases by the liquor board were in excess of sales by 2,500 gallons, which went into stock.

In 1943, the Alberta quota for liquor was 109,827 gallons (70 per cent of 154,754 purchases). Of this amount, only 137,000 gallons was received. Thus the province received 12,813 gallons less than it was allocated in the quota.

Actual sales of liquor in 1943 totalled 218,207 gallons. The difference of Alberta bonds, however, and the amount sold was made up out of stocks on hand.

After discussing the chart, Mr. Low said: "Doubtless some honorarium can be settled, and to that end we shall constantly strive."

"In the west, especially in Alberta, we had not reached by 1942 anything like the population, industry, and income that came in 1943. But the fact is true, I feel fairly certain that some of the eastern provinces were 'tipped off' that the order was coming, and they therefore bought heavily from distilleries stocks in anticipation," the minister said.

Hence, for some time, these eastern provinces were able to provide as much as permits wanted to buy, he said.

"I am informed that individuals in Ontario and Quebec bought cases at a time, even after the Dominion's order was announced."

However, all of the provinces are getting down to our level of allowable now. The House was told, "Alberta was never tipped off, and it can be shown beyond any doubt that the Dominion government fixed the base year to give the greatest advantage to Quebec," said Mr. Low.

He concluded his reference to liquor by saying that in spite of all the difficulties faced, the Liquor Control Board is doing the best possible job of handling the situation in spite of the impatience of the various provinces, and the bungling of the government.

QUESTIONS "WATERING"

At the conclusion of the minister's address, J. J. Bowlen (L.-Calgary) rose and asked Mr. Low: "Where is the watering of liquor being done? What is the percentage of water in liquor? and Why is there a bull price when liquor is watered?"

In reply, Mr. Bowlen was told the watering is not done in Alberta; liquor now comes in at about 6 points underproof, as is required by the federal government regulations, and that a price increase of \$4 a proof gallon was put into effect under the same regulations.

"These regulations must be complied with before the province can claim for lost liquor revenues because of restrictions."

obtainable by permittees in the several provinces of Canada.

"In that connection, I can only say that the Dominion government created gross inequalities as between the amounts allowed to the various provinces under their wartime order by the way in which they went about it to begin with."

Mr. Low went on to say that it is true that because of the earlier establishment of war industries in the eastern provinces, the consumption of liquor there had reached about the peak in what the Dominion government chose as the base year, upon which the quotas were calculated.

In the west, especially in Alberta, we had not reached by 1942 anything like the population, industry, and income that came in 1943. But the fact is true, I feel fairly certain that some of the eastern provinces were 'tipped off' that the order was coming, and they therefore bought heavily from distilleries stocks in anticipation," the minister said.

Hence, for some time, these eastern provinces were able to provide as much as permits wanted to buy, he said.

"I am informed that individuals in Ontario and Quebec bought cases at a time, even after the Dominion's order was announced."

However, all of the provinces are getting down to our level of allowable now. The House was told, "Alberta was never tipped off, and it can be shown beyond any doubt that the Dominion government fixed the base year to give the greatest advantage to Quebec," said Mr. Low.

Premier to State Canada's Policy Toward Argentina

OTTAWA, March 8.—(C.P.F.) Prime Minister Mackenzie King said yesterday in the commons that he would make a statement Thursday in regard to recognition of the new Argentine government.

He was answering Gordon Graydon, Progressive Conservative leader, who said the house should be acquainted with the progress government in recognizing the Argentine government.

Domestic Court For Map Urged

WINNIPEG, March 8.—(C.P.F.) J. Farmer, C.C.F. opposition leader, yesterday urged establishment of a court of domestic relations and appointment of a public defender in Manitoba. He urged a special select committee of the provincial legislature consider his suggestion.

Valuable Franchise

The banks in operation the most valuable franchise that can be given to any group of people, he said. "That franchise will have to be operated in the interest of the people or it will have to be either controlled or taken over."

As a Liberal, he said, he preferred control of taking over the banking system and placing it in the hands of the politicians if the kind of government ownership and control proposed by the C.C.F. became effective.

Debate was adjourned on motion of John Diefenbaker (P.C.-Lakeland).

Domestic Court For Map Urged

Husband Too Old for Wife; Quarrels Likely

Eighteen Years Difference Creates a Social Gulf Difficult to Overcome; Husband and Wife of Different Generations

DEAR MISS DIX: I am a young girl engaged to a man 18 years older than myself. He wishes me to marry him immediately, but I am afraid that the difference in our ages is too great. I have a friend who married a wealthy man with about the same difference in their ages. He never loved her anywhere. He never wants any friends to come to the house. He had all his money before he married her, so he always refers to everything as his, and although he

is rich he gives her only a small allowance. Are all old men like this? I H. L. R.

ANSWER: I think 18 years difference in age between a man and woman is entirely too much unless the man happens to be of a very youthful temperament and the woman is of a very old and sedate in her ways. Then the two might come together on the platform of mutual respect and habits, but the average man and woman would find that 18 years made a gulf between them that even with their best endeavors they could not bridge.

That is why people should always marry in their own age class. They should have the same tastes, the same ideas and ideals, the same platform of mutual respect and habits, but the average man and woman would find that 18 years made a gulf between them that even with their best endeavors they could not bridge.

Don't be misled by the living old man who is better to be an old man's darling than a young man's slave. There is no tyrant more merciless as the old and no slavery more complete than that of the young woman who is married to an old man.

Far better to marry a poor young man and work up with him than an old man who will make you his slave. He will not let you go and he will put up with his whims. A young husband will, at least, have sympathy with you and understand why you want to stop out and go places, but an old man will think you foolish and unreasonable if you wish the pleasures of youth because they do not appeal to him.

GIRLS AND BOYS
DEAR MISS DIX: Why do girls get more enjoyment out of the company of boys than of girls? I have lots of girl friends who will make me feel like a queen when I go out with them. I have a boy friend who is just what I need. I would give up the best of the season with a boy rather than miss a society meeting. The girls make me have a lot of fun. I am all together and they will call a boy a "dope" when I am with them. I would give up the best of the season with a boy rather than miss a society meeting. The girls make me have a lot of fun. I am all together and they will call a boy a "dope" when I am with them.

ANSWER: It is biological, Janice. I believe girls are built that way. It is because the instinctive thing in every girl is to find her mate, and she sees a prospective husband in every boy.

Of course, there are a few women when men do not attract them, but that is the exception of their own sex, and these are almost as scarce as hens' teeth. The average woman gets more enjoyment out of being with the dullest man than she does with the most brilliant and entertaining woman. Every day you see girls gazing upward in rapt adoration at the feet of a man who wouldn't tolerate a girl for an instant if she were stupid and slow.

And, girls still have the idea that reflects credit on them to have a man who is a dummy. They have to have to run around with other girls, even if the girls are charming and agreeable, because they put up with anything that wears trousers. And there you are. And that's the way the good Lord made 'em.

HANDSOME
DEAR MISS DIX: I am a poor fellow with no money, but I am so handsome that all the girls fall in love with me. What must I do?

ANSWER: Why don't you marry a millionaire and cash in on your looks? Or maybe Hollywood is your destination, where male publicity seekers seem to be at a premium. Anyway, accept my congratulations. It must be wonderful to enjoy looking at yourself in a mirror. When God gives a person as much content as you have, he need never need any more. He has all that he wants in the world.

Bulletin Patterns

By ANNE ADAMS

4702
You'll be amazed at the versatility of this unexcelled style. For instance, try Pattern 4702 first in one of those crisp, bright cottons that you can wear marketing and gadding about your neighborhood. Then make it in a rayon or wool that will go anywhere.

Pattern 4702 is available in misses' and women's sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30. Size 36 takes 3 1/2 yards 36-inch.

Sent twenty cents (20c) in coins (stamps cannot be accepted). For full particulars, send your name, address, city, state, and zip number.

Send your order to Pattern Department, The Edmonston Bulletin, 60 Front St. W., Toronto, Ont.

Please allow a week or ten days for delivery.

Minute Make-Ups

March is the month for lovely yellow daffodils. Wear a great bunch of them on your birthday. You should wear yellow for happiness and your birthstone, the Jasper, for health and long life. Your perfume should be a light flower-scented color. You are a child of spring!

Good Night, Sweet Prince

Jack Barrymore was growing in more ways than tall when it was decided to send him to Seton Hall school in South Orange, N.J. Maurice accompanied his younger son and they toured the campus with the head of the school, Father Marshall.

Father Marshall had a serene personality, dignified and reserved. In the gymnasium, he indicated an appearance. "Have you ever exercised on the horizontal bars, son?"

"Yes, Father," Jack replied. "Lots."

"Then get up on the bars and let the plant swing," Father Marshall said to the air, standing on his hands on the bars. Suddenly, from his pockets there appeared some curious keepsakes, including a razor, a loaded pipe, a pack of playing cards and a pair of dice.

McCoys Health Service

A good circulation of blood is absolutely essential to the enjoyment of perfect health. Even in good health, there is a very marked difference in the rapidity of the flow of blood in different parts of the body. When a partial stoppage exists in any part, that part will become cold, but an old man will think you foolish and unreasonable if you wish the pleasures of youth because they do not appeal to him.

The blood is the great porter of the system—that transfer agent which supplies all parts of the body with the life-giving material, and also picks up and carries to their outlets, various kinds of waste materials. Its presence in life, absence is death. An efficient circulation is the paramount condition of life and all its marvelous functions.

The theory that the heart propels the blood is only partly true. The power of controlling the material, and also picks up and carries to their outlets, various kinds of waste materials. Its presence in life, absence is death. An efficient circulation is the paramount condition of life and all its marvelous functions.

ANSWER: It is biological, Janice. I believe girls are built that way. It is because the instinctive thing in every girl is to find her mate, and she sees a prospective husband in every boy.

Of course, there are a few women when men do not attract them, but that is the exception of their own sex, and these are almost as scarce as hens' teeth. The average woman gets more enjoyment out of being with the dullest man than she does with the most brilliant and entertaining woman. Every day you see girls gazing upward in rapt adoration at the feet of a man who wouldn't tolerate a girl for an instant if she were stupid and slow.

And, girls still have the idea that reflects credit on them to have a man who is a dummy. They have to have to run around with other girls, even if the girls are charming and agreeable, because they put up with anything that wears trousers. And there you are. And that's the way the good Lord made 'em.

HANDSOME
DEAR MISS DIX: I am a poor fellow with no money, but I am so handsome that all the girls fall in love with me. What must I do?

ANSWER: Why don't you marry a millionaire and cash in on your looks? Or maybe Hollywood is your destination, where male publicity seekers seem to be at a premium. Anyway, accept my congratulations. It must be wonderful to enjoy looking at yourself in a mirror. When God gives a person as much content as you have, he need never need any more. He has all that he wants in the world.

March is the month for lovely yellow daffodils. Wear a great bunch of them on your birthday. You should wear yellow for happiness and your birthstone, the Jasper, for health and long life. Your perfume should be a light flower-scented color. You are a child of spring!

Father Marshall picked up the strap, saying, "I don't think you will need these after all, my son."

Then one day at classes, an assistant instructor laid his hand on a head while repudiating him for reading Buffalo Bill's Adventures behind a text-book. Jack wrote a blood-curdling letter home about brutality. He heard that Maurice Barrymore was coming to investigate.

He told classmates, "My father on his way to beat seven kinds of hell out of the entire faculty. Blood will flow from him to Newark. What a friend he is a crisis!"

Waiting in the shrubbery, Jack said a gallery saw a careerist Maurice along with a carriage.

"He don't look so tough in one," a boy told Jack.

"Hah!" snorted Jack. "A lot you know about real fighters. They have a graveyard smell just before they die."

THESE WOMEN!

"You suspect my Butler? Ridiculous! A few Jewels wouldn't tempt anyone with the wages HE's getting!"

Smart Foot-Ease

By ALICE BROOKS

red to the tissues, and the constant giving out of carbon dioxide apparently creates a sort of perpetual motion, which seems to help blood, a great deal in making its rounds.

With our limited knowledge, we can not hope to profess to know all about the many factors which keep the vital fluid flowing, but I believe that the above factors are worth considering. If there is any lesson to be learned from them it is the lesson that exercise to develop muscle tone, and good habits of breathing, help to create a good circulation.

All questions regarding health and diet will be answered. Large stamped, self-addressed envelope must be enclosed. Write on both sides of paper. Letters must not exceed 150 words. Address: McCoys Health Service, The McCoys Building, 1151 West 6th Street, Los Angeles, Calif.

WATCH THE WASTE LINE

There's a certain amount of waste when food is transferred from cooking dish to serving dish. Using the same dish for cooking and serving wastes as well as dish washing.

HOLD EVERYTHING BURLESQUE

Here's bliss for tired, out-of-duty feet... slippers in jiffy crocheted... soft and comfy as they are colorful. Make the good, firm soles of... guess what...? Fast! The uppers which are comparatively rich in smart gift in footwear that will wear like iron. Pattern 7596 contains instructions for slippers in small, medium and large sizes; stitches.

Send twenty cents in coins for this pattern (stamps cannot be accepted) to Household Arts Dept., The Edmonston Bulletin, 60 Front St. W., Toronto, Ont. Write plainly name, address, pattern number.

Please allow a week or ten days for delivery.

Approximately 142,000,000 tons of water evaporate from the surface of Great Britain annually, according to scientists.

This Not This

Mother: "Boys who are big enough to go down town with their mothers do not cry for what they want. I'll have to try to find my way to leave you at home next time."

Never make it possible for a child to discover that disagreeable behavior is his most effective weapon.

McKenney On Bridge

By WILLIAM E. MCKENNEY
America's Card Authority

Here is a hand on which the North and South players stopped at four spades, as they did on yesterday's hand. As soon as South revealed his construction, response from his partner, he should have sensed the possible slam in the hand.

Over one spade, perhaps the bet was for four spades, but the trump suit was not in the cards. That would tell his partner that he had a good hand with at least a partial fit in spades.

North, knowing that his hand was not made for four spades, would undoubtedly bid four spades over two trumps. Now South could make a slam and try by bidding five clubs. North, with his fine fit in clubs, would not at any time in getting into six spades.

If the spades break two-two, there is a possibility of making seven on the hand. If the spade suit breaks badly, it is still insured if the diamonds break three-three or if the club finesse is guessed correctly.

It is said that Spunkin is the toughest skin available for upholstery furniture.

NO DULL DRAW HAIR

When You Use This Amazing 4 Purpose Rinse

In one, simple, quick operation, OVALOIN does all of these 4 important things for you:

1. Gives lustrous highlights.
2. Removes every shampoo film.
3. Cleanses the scalp.
4. Helps keep hair neatly in place.

OVALOIN does not dry or bleach. It is a new, modern hair rinse in 12 different shades. Try OVALOIN. 40¢ each (12 for \$4.00). 12 for \$3.00. 24 for \$5.00. 36 for \$7.00. 48 for \$9.00.

Try This Old Home-Mixed Cough Relief. Surprising!

Anyone Can Make It. No Cooking. Big Saving. You may not know it, but in your own kitchen, and in just a moment, you can easily prepare a really surprising relief for coughs due to cold. It's old-fashioned—your mother probably used it—but it really works. It is hard to beat.

First, make a syrup by stirring 5 cups granulated sugar and 1 cup water in a saucepan until dissolved. No cooking needed. No trouble at all. Or you can use brown sugar or fruit sugar, instead of sugar syrup.

This gets 5 1/2 ounces of Vicks Vapo-Rinse.
